NEC Meeting Center (NMC) SVRU 2 Blade for UNIVERGE® SV9100 & SV9300

Just a few months ago, NEC Corporation of America, released NEC Meeting Center (NMC) for the SV9100 and SV9300 (Ref: [DL6086355](#)). This release positioned NMC as a premier multimedia option for businesses that provides an all in one audio conference, firebar, mass notification and web collaboration solution.

Today, NEC introduces the **NMC Audio Conference as a standalone** solution for the SV9100 and SV9300 on the NMC server blade. The NMC Audio Conference meets the need for a growing demand for an audio conference only solution and replaces the GCD-RGA that was discontinued May 2017 (Ref: DL7165428).

The NMC Audio Conference is one of the four powerful solutions that make up NMC. The formula is simple, continue to use the NMC server blade, an already proven hardware, and continue to use an already familiar Audio Conference solution.

Studio has been updated to reflect new part numbers for NEC Meeting Center (Full Version and NEC Meeting Center Audio Conference).

Availability and Ordering

- NMC Audio Conference will be available in the Studio as of September 1, 2017. NEC Customer Service will accept orders beginning on September 1, 2017 with shipping available immediately.
- Licensing is now done within the standard NEC License Management Server.
- [NEC Meeting Center Brochure](#)
- [NEC Meeting Center Release Note](#)
- Refer to SV9100 Price Book for complete NMC price information and part description.
- Refer to table 1-1 for list of NMC parts.

Should you have any questions, please contact your NEC Account Manager or Sales Engineer.

Sincerely,

Stacey Thomas
